For the time of recovery of any mining farm, the distribution of profitability by rule: 90% to Investors, 10% to the management of Crypto Signal Technology Ltd. After payback of any mining farm, the distribution of profitability by the rule: 75% to Investors, 25% to the management of Crypto Signal Technology Ltd.

The yield on any mining farm is floating, depending on the activity of the farm for a full month, without clear promises and clear interest (with all the risks involved in mining the sphere)
